Let’s take a look at the tax efficiency of your investment income

Different types of investment income are taxed differently. For example, non-qualified dividends and short-term capital gains are taxed as ordinary income at higher rates, while qualified dividends and long-term capital gains are taxed at lower preferential rates. And depending on your marginal bracket, it may be more tax efficient to use tax-free income vehicles like municipal bonds/bond funds instead of taxable income options.

Schedule C/E - Income Sources

The tax return listed the following businesses and entities on schedules C or E

SCHEDULE C

Observations

Given that you reported income on Schedule C, E, and/or F, your risk of costly errors is elevated. You may consider working with a tax professional next year.

Income is within 10% of the threshold for the 3.8% Net Investment Income Tax (NIIT). Consider strategies to reduce taxable income and be mindful of realized capital gains.

You are in the 22.0% marginal bracket. Depending on your age and income projections, you might consider a Roth conversion.

The 2025 safe harbor for underpayment penalties is your total tax x 110%, or \$33,951. Note that the timing of your payments is also important with respect to avoiding penalties. Withholding from a paycheck or retirement account distributions are considered to have happened throughout the year, but estimated tax payments should be timed to correspond with the timing of the income earned. A tax professional should be able to help in cases where income is uneven throughout the year.

Your Modified Adjusted Gross Income (MAGI) suggests you are eligible to contribute to a Roth IRA. Note that Roth contributions must come from what the IRS calls "compensation income". The tax return does include some compensation income.

Your tax return suggests you may have business income. Depending on your circumstances, you may be able to implement a retirement plan for the business to defer taxes.

You deducted mortgage interest on your tax return. Given the high standard deduction, itemized deductions on mortgage interest are less valuable than they once were.

You had charitable contributions in excess of \$10,000. If you plan to do donations of similar size in future years, you may consider grouping them into alternating tax years to maximize your deductions. A "Donor Advised Fund" can facilitate this strategy.

Form 8606 reports after-tax basis in at least one retirement account. This basis reduces the amount of taxable income generated from a Roth conversion or normal distribution.

Your tax return does not list any HSA contributions. If you are eligible to contribute to an HSA, you will get a tax deduction, regardless of whether you itemize or take the standard deduction.

You owed additional taxes beyond any withholding or estimated tax payments. If this was due to a one-time event, you may not need to take any action. If not, consider adjusting your withholding to avoid any surprise lump sum payments due at tax time.

A portion of your retirement or annuity distributions was not taxable. This suggests some after-tax basis in the account, a rollover, a tax free Roth distribution, or a Qualified Charitable Distribution.

Schedule C does not include any expenses on line 9, car and truck expenses. Do you use a vehicle for any business-related activities?

For the ACA Premium Tax Credit, taxpayers with MAGI of less than 100% of the Federal Poverty Limit (FPL) are not eligible to receive any credits. Generally, taxpayers with MAGI between 100% and 400% of the FPL are eligible to receive the credit on a sliding scale. Taxpayers with MAGI above 400% of the FPL may receive the credit, to the extent the credit will keep the cost of the benchmark plan to no more than 8.5% of household income.

Review employer-provided benefits to ensure you are taking full advantage of any pre-tax options.

Keep track of your home improvement expenses for determining your adjusted cost basis in the event of a home sale.

You converted \$25,000 from a Traditional IRA, SEP IRA, or SIMPLE IRA to a Roth IRA. Of this conversion, \$9,750 was taxable as ordinary income, as reported on Form 8606.

Your modified adjusted gross income (MAGI) appears to be low enough to qualify for the new but not the used clean vehicle credit, assuming you purchase such a vehicle and it meets the other eligibility criteria. Note that you may still be eligible for the used vehicle credit based on MAGI, as you can use your MAGI from the year you take delivery of the vehicle or the year before, whichever is less. If your modified AGI is below the threshold in one of the two years, you can claim the credit.
